EAST MIDLANDS AIRPORT MEET THE BUYERS 2024

About East Midlands Airport.

East Midlands Airport (EMA), owned and operated by MAG (Manchester Airports Group) is the region's gateway to mainland Europe, Eastern Europe and North Africa. Served by airlines Ryanair, Jet2, TUI, Flybe, Aurigny and Eastern Airways, the eight million people who live within an hour's drive of the airport are well catered for in terms of leisure connectivity with a choice of more than 60 international and domestic destinations.

Handling 400,000 tonnes of cargo a year, EMA is also home to the UK's largest dedicated air cargo operation and is the UK's no.1 airport for express freight. As a hub for integrators such as DHL, UPS, FedEx and Royal Mail, within one stop of EMA, global trade is facilitated with more than 180 of the world's largest cities.

Over 9,000 people work across the entire airport site for a wide range of employers many of which support the aviation sector..

Steve Griffiths

Managing Director, East Midlands Airport

We are a new Shared Business Services NHS Framework Supplier with **25 years experience** within the public sector, specialising in all aspects of electrical works.

Compliance & EICR Testing

EICR testing and remedials.
Thermography – nonintrusive testing of the distribution boards. Our advanced camera’s will indicate any faults within the db’s as a heat source, not visual to the eye.

EV - Car Charging

Our skilled team will complete site surveys, including load monitoring to validate the power availability of a site. We can then supply and install the best suited electric car chargers along with any infrastructure requirements. Back-end software can be added allowing clients to manage the chargers and generate revenue.

Lighting Specialists

We supply and install quality energy saving lighting which are maintenance free and backed by our industry leading warranties. Due to our experience within this sector, we can advise and source lighting to suit any environment.

No subcontracting & National Coverage

Our highly skilled team are fully employed by TCS and further training is regularly undertaken in our inhouse training academy. We utilise the latest innovative technologies such as augmented reality glasses to reduce our carbon footprint which also improves our quality and speed of service to our clients.

Electrical Design & installation

We offer a complete turnkey electrical installation service, from electrical design to a complete building installation. Our load monitoring machines can be installed nationally, these measure a sites power usage and rating.

Funding packages are available for all works.

ABOUT

We are BAM UK & Ireland, part of the Royal BAM Group. For 150 years, we have been shaping the UK & Ireland's vital infrastructure and creating many of the country's most iconic buildings.

We deliver construction, civil engineering, infrastructure, property development and facilities management projects in the public and private sectors. We use the latest digital technologies and modern methods of construction to deliver in a lean, green, and more efficient way.

We want to leave our world a better place than we found it – to build a more sustainable tomorrow. We've set an industry-leading carbon target to become net zero in our direct operations by 2026 and we're supporting our clients to create more sustainable places.

Visit us at: <https://ukandireland.bam.com>

BAM is proud to be supporting MAG's Meet the Buyer event. We embrace a culture of partnership and forge strong alliances with both our clients and our supply chain partners.

People are at the heart of everything we do. We employ great people, who we value and support. We prioritise our relationships with our client and supply chain partners. And we strive to strengthen communities and transform lives in the places where we work, leaving a lasting social impact legacy.

ABOUT

Costain - Working with you to transform your performance and accelerate your organisation's transition to net zero aviation.

Our team of dedicated consulting, digital and construction experts is passionate about shaping, creating and delivering pioneering solutions which transform the performance of airport operations and infrastructure. We design bespoke solutions which enhance the customer experience of air travel and enable the transition to net zero aviation.

We do this by:

Working with you in your business to manage and optimise your assets and develop solutions that deliver value outcomes.

Using data to drive better decision-making, transforming business performance and infrastructure intelligence.

Together, we can create connected, sustainable infrastructure to help people and the planet thrive.

ABOUT

GEDA is an award-winning, multifaceted Construction, Civil Engineering and Development company based in Co. Tyrone, Northern Ireland. First established in 1982, we now operate throughout Ireland and the East Midlands in England. We've built a huge legacy of Civil, Commercial and Building projects throughout these regions and continue to maintain a strong reputation in the spaces we've transformed. Since the 1980's, GEDA Construction has been delivering construction excellence to private and public sector clients, throughout the UK and Ireland.

We specialise in medium and large-scale developments in Educational, Residential, Civil and Commercial sectors. GEDA is built on people and they're at the centre of everything we do. From Health and Safety, training and development, leadership, culture and values; our people are what makes us unique and they're behind our every success.

We strive to engage with and do what we can to improve the communities and spaces we work in. From our environmental footprint to engaging with local communities, we want to make a difference and stand out from the crowd.

ABOUT

Morgan Sindall Group plc is a leading UK Construction & Regeneration group of specialist businesses, delivering construction and regeneration across the UK for the public, commercial and regulated sectors.

Morgan Sindall Infrastructure delivers some of the UK's most complex and critical infrastructure for both public and private customers.

Morgan Sindall Infrastructure – Aviation

Aviation infrastructure connects people and cities across the globe. Meeting the UK's current and future demands requires infrastructure – but this must be balanced to support growth while minimising environmental impacts.

Customers trust us to run every aspect of their infrastructure assets safely, securely, and efficiently, ensuring a smooth, comfortable airport experience for passengers.

Whether designing and building new terminals and control towers, installing check in and baggage handling systems, landside and airside taxiway and runway works or deploying teams 24/7 to repair and maintain pristine taxiways and runways to keep flights on schedule, we help ensure better journeys for everyone.

Airports present a complex, challenging operational environment. We work tirelessly behind the scenes to provide the physical infrastructure and systems that keep them functioning efficiently. Customers have confidence in our understanding of the tight working windows, stringent safety requirements, and security responsibilities of working in a live air-side situation.

One of our total commitments is 'Working together with our supply chain' reflects our approach of engaging, working collaboratively and developing our partners in safety and responsible business practices and encouraging knowledge sharing and innovation.

ABOUT

Oliveti Construction Ltd was established in 1993 by Managing Director Gian Oliveti, to provide a comprehensive, local construction service to the people of Leicester and surrounding areas. Gian recruited experienced, multi-skilled tradespeople to build on his vision, and with hard work and determination, Oliveti became a maintenance and planned works specialist initially in the domestic market.

During the early years, Gian employed several apprentices and young operatives, many of which still remain with the Company today having begun their careers as junior site operatives over twenty years ago, rising through the ranks to help lead Oliveti Construction into the future as managers and also directors. This strong core group of people that have grown with the Company, really do give a family feel, but with the professionalism that comes with many years of experience.

In keeping with Gian's vision of a 'one-stop-shop' for our clientele, our own in-house joinery workshop was later established along with Oliveti Cubicles. Our manufacturing workshop produces many bespoke items including washroom solutions, IPS panels, reception desks, cubicles, unitary and bespoke furniture, as well as creating and restoring joinery for listed buildings, such as timber windows and doors.

In 2015 the Company outgrew our original premises and relocated to our present, more central location, just off the M1 in Leicester. Here we have established the Oliveti Training facility, used not only to host our own staff training events but also as a venue to provide training for other construction company staff and to use as a base for events delivered in partnership with local colleges and initiatives set up to promote the construction industry as a career choice. Our directly employed, experienced, and qualified Health & Safety Manager Andrew Essex, not only helps Oliveti keep our exemplary health and safety record, and he is also a qualified trainer at the facility.

Oliveti is only as good as its people and to that end, we invest heavily in the training and development of our staff. From our very first Kitchen Replacement contract in 1992 to 2024 where we have maintained our reputation for high-quality service operating as a contractor on several prestigious Frameworks throughout the Midlands and surrounding areas. Oliveti works across many sectors including education, commercial, domestic, disability, small works, and maintenance and manufacturing.

ABOUT

VolkerFitzpatrick is one of the leading engineering and construction companies in the UK. We provide specialist multi-disciplinary engineering solutions to a wide range of markets to deliver a truly integrated service for our clients. We are proud to say our history dates back over 100 years, and currently turns over more than £600m per year, ensuring we are able to meet the growing demands of today's construction industry. Our specialist capabilities are the heart of our business; as a supply chain partner we work nationally to solve complex challenges in all kinds of diverse environments. Our proven expertise in delivering successful projects in a wide range of sectors include rail and depots, buildings, highways, airports, ports and defence.

We have a long and successful association with various airport operators across the UK and have gained a reputation for innovation and best practice through the delivery of over 55 aviation related projects in the last 10 years. Our capability extends from runway, taxiway and apron rehabilitation, including the replacement and upgrade of all associated infrastructure such as Airfield Ground Lighting (AGL), drainage, line marking and mechanical and electrical systems, to landside infrastructure works such as access roads, car parks, flood attenuation and external security gates.

PIONEERING WORKPLACE SAFETY

MEET THE EXHIBITORS

A-SAFE

**GOLD
SPONSOR**

**STAND
01**

ABOUT

A-SAFE is a leading global workplace safety solutions provider. Since 1984, the business has been pioneering state-of-the-art solutions that safeguard people and assets across a variety of sectors, all around the world.

Our Atlas range of airport barriers has been purpose-designed and engineered to provide unrivalled heavyweight protection for demanding airport environments. Atlas barriers fulfil the most rigorous of safety standards and are capable of withstanding impacts from fully laden baggage tugs and dollies. They are the safety barriers of choice for many of the world's leading airports.

Designed for use in busy baggage halls, cargo facilities and terminal buildings – as well as outdoors on aprons and service roads – the A-SAFE range of airport products segregates vehicles from pedestrians as well as critical infrastructure, providing supreme protection to charging stations, floodlights, passenger boarding bridges, masts, and other essential equipment.

A-SAFE is the only airport polymer safety barrier manufacturer on the market to test and independently verify its products to the rigorous standards of PAS 13, a global benchmark for barrier testing developed by the British Standards Institution. Every test is independently certified by TÜV Nord, an international leader in controlled testing.

From safety to risk reduction, protection to cost savings, whatever the problem, we never sit back while someone else does the work, we find the very best way of solving it.

CONSULTUS INTERNATIONAL GROUP AND CONNECTUS

**GOLD
SPONSOR**

**STAND
02**

ABOUT

Consultus International Group is recognised as the UK's most trusted Energy Consultancy and one of the UK's leading Net Zero delivery partners. We work with businesses and their supply chains to plan, prioritise and achieve their carbon neutral goals, and in the process help them to use less energy, reduce costs, better manage risk, and increase their energy security. Our clients include Gatwick Airport, Weetabix, Hilton, Radisson Hotel Group, English National Opera, The National Lottery and Maersk.

Connectus are experts in coordinating multi-utility siteworks, connections, disconnections and diversions, to help companies avoid unnecessary costs and deliver projects on time. They hold a strong background in providing utilities within the construction sector across residential, commercial and mixed-use projects, including refit and refurbishment.

We deal with utility networks so you don't need to

Utility Infrastructure Management

100% independent, we take the pain away from a process that can be a massive drain on resources

For your utility review, contact us today:

MAG

STAND
07

ABOUT

East Midlands Airport (EMA), owned and operated by MAG (Manchester Airports Group) is the region's gateway to mainland Europe, Eastern Europe and North Africa. Served by airlines Ryanair, Jet2, TUI, Flybe, Aurigny and Eastern Airways, the eight million people who live within an hour's drive of the airport are well catered for in terms of leisure connectivity with a choice of more than 60 international and domestic destinations.

Handling 400,000 tonnes of cargo a year, EMA is also home to the UK's largest dedicated air cargo operation and is the UK's no.1 airport for express freight. As a hub for integrators such as DHL, UPS, FedEx and Royal Mail, within one stop of EMA, global trade is facilitated with more than 180 of the world's largest cities.

Over 9,000 people work across the entire airport site for a wide range of employers many of which support the aviation sector.

2BM LIMITED

STAND
11

ABOUT

Established in 2002, 2bm has delivered new and refurbished data centres and provided power and cooling upgrades for legacy facilities for over two decades.

2bm's strengths are founded on the ability to be agile and work collaboratively with our clients, building long-lasting, mutually beneficial business relationships.

We have designed, installed and developed a series of low-energy, high-capacity solutions and, in staying familiar with emerging technologies, we are equipped to design the most innovative, efficient and cost-effective data centres possible.

As well as focusing on giving clients energy-efficient systems, 2bms designs ensure that each data centre can cope with the changing environmental demands, including the effects of climate change and increased ambient temperatures.

As a company, 2bm prides itself on being vendor neutral too, and as such, we can offer first-class independent advice on design as well as true neutrality in selecting hardware that will perform the best.

2bm always recommends the best solution that's right for a project, our client's money isn't ours to waste – and we never overstay our welcome either – we simply get the job done so they can focus on their businesses.

DARIAN GLOBAL SOURCING

STAND
14

ABOUT

Darian has been at the forefront of international global sourcing ever since the company was established in 1986. We supply a wide range of custom manufactured components to leading OE manufacturers in the UK and Germany.

We specialise in the supply of castings, CNC machining, pressings, stampings and fabrications as component parts or sub-assemblies.

Many companies are faced with constant pressures to reduce manufacturing costs in a climate of ever increasing costs and lower margins. There is a growing realisation within the manufacturing sector that in order to survive and succeed they have to look to outsourcing production.

At Darian we have professionally qualified staff with a wealth of experience who are able to help you achieve this goal. Darian is represented globally in various locations across the UK, Europe, Turkey, India and the Far East and locally employed staff support the activities of the UK based head office. We believe in providing quality components sourced from the most competitive suppliers and offering the best customer service. When you buy from Darian you get great customer service, supply chain management, quality control, on-time delivery at no direct cost.
